

Continental Divide
Milner Pass elev. 10,759
The "Great Divide" separates drainage to the Atlantic from drainage to the Pacific. It traverses America from Alaska almost to Cape Horn.
Atlantic Ocean drainage
Cache La Poudre Creek drains into the Platte River which flows to the Missouri, then to the Mississippi, thus reaching the Gulf of Mexico. (part of the Atlantic Ocean).
Pacific Ocean drainage
Beaver Creek drains into the Colorado River, which then flows through Grand Canyon National Park and on to the Gulf of California. (A part of the Pacific Ocean).
